🔗 Amr Ahmed

Summary

Junior .NET Developer experienced in ASP.NET Core MVC, C#, LINQ and EF Core. Specializes in designing and optimizing data models, queries and RESTful APIs using SOLID principles and Clean Architecture. Collaborative professional with expertise in API design and the MVC pattern.

Projects

Survey Basket, *Survey Management API* 📄

- Built efficient survey platform for creating, sharing and analyzing polls with thousands of responses
- Implemented secure role-based user authentication system protecting sensitive data
- Optimized performance through database query improvements and caching implementation
- Designed automated notification system increasing survey participation rates
- **Technologies Used** : Web API, SQL Server, Entity Framework Core, Identity, JWT, Email service integration, MailKit, MimeKit, Serilog, Result Pattern, FluentValidation

Raknah, *Smart Parking System* 📄

- Built smart parking system for finding, reserving, and accessing spots with integrated hardware gate Control
- Implemented reservations with real-time updates and automated email notifications
- Connected software with physical infrastructure for seamless end-to-end solution
- Created user authentication with secure account and reservation management
- **Technologies Used** : ESP32 microcontrollers, ASP.NET Core, Web API, SQL Server, Entity Framework, LINQ, Identity, JWT, Hangfire, HttpClient, Mapster, Email service integration, MailKit, MimeKit, Serilog, Result Pattern, FluentValidation

Bookfiy, *Library Management MVC* 📄

- Built comprehensive digital library management system for creating, tracking, and managing books, subscribers, and rentals
- Implemented secure role-based user authentication with Identity, protecting sensitive library data and operations
- Created multilingual support with localization capabilities and developed reporting system for insights on books and rentals
- Designed automated notification system using Hangfire for rental expiration alerts via email and WhatsApp
- **Technologies Used** : ASP.NET Core, MVC, Entity Framework Core, SQL Server, LINQ, Identity, JWT, Hangfire, AutoMapper, Serilog, Cloudinary, Repository Pattern, Clean Architecture, FluentValidation, Bootstrap, jQuery

skills

- Languages : C#, JavaScript, SQL, C, C++, PHP
- Frontend : HTML, CSS, Bootstrap, jQuery
- Backend : ASP.NET Core, ASP.NET Core MVC, ASP.NET Web API, LINQ, EF Core
- Databases : MS SQL Server, My SQL
- Tools : Visual Studio, VS Code, Git, Azure DevOps, Github, .NET CLI
- Others : Unit Testing (xUnit), OOP, Design Principles, SOLID, Design Patterns, Algorithms, Data Structures, Clean Architecture, Repository Pattern

Education

Bachelor's Degree in Information Technology and Systems,

2021 – 2025

Faculty of Management Technology and Information Systems.

Port Said, Egypt

Graduation Project : Raknah, a smart parking system integrated with hardware that helps users find, book, and access parking spots easily while managing reservations and user accounts.

Certificates

ITI Summer Training 2023

Web Development using Asp .NET Core

- SQL Server
- C#
- LINQ & EF Core
- Asp .NET Core MVC
